

AMENDMENTS TO THE CLAIMS

Claims 18-19 and 25-37 are pending.

Claim 19 is being amended, and new claims 38-49 are being added.

After the amendments, claims 18-19 and 25-49 will be pending.

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1-17 (Canceled)

18. (Currently amended) A method of preparing a cellular composition for transplantation into a recipient, comprising the steps of:

- (a) selecting a cellular composition for transplantation; and
- (b) contacting the composition with a reovirus ex vivo to result in oncolysis of ras-mediated neoplastic cells;

wherein said transplantation is autologous.

19. (Currently amended) A method of preparing a cellular composition for transplantation into a recipient, comprising the steps of:

- (a) selecting a cellular composition for transplantation; ~~and~~
- (b) contacting the composition with a reovirus ex vivo to result in oncolysis of ras-mediated neoplastic cells; and
- (c) ~~further comprising the step of~~ administering to the transplant recipient at least one substance selected from the group consisting of anti-reovirus antibodies and immune system stimulating agents.

20-24 (Canceled)

25. (Previously presented) The method of claim 18 wherein the reovirus is a mammalian reovirus.
26. (Previously presented) The method of claim 18 wherein the reovirus is an avian reovirus.
27. (Previously presented) The method of claim 25 wherein the mammalian reovirus is a human reovirus .
28. (Previously presented) The method of claim 25 wherein the mammalian reovirus is serotype 3 virus.
29. (Previously presented) The method of claim 28 wherein the serotype 3 virus is the Dearing strain.
30. (Previously presented) The method of claim 18 further comprising the step of freezing and storing the reovirus-treated composition in a solution containing DMSO.
31. (Previously presented) The method of claim 19 wherein the transplantation is autologous.
32. (Previously presented) The method of claim 19 wherein the reovirus is a mammalian reovirus.
33. (Previously presented) The method of claim 19 wherein the reovirus is an avian reovirus.
34. (Previously presented) The method of claim 32 wherein the mammalian reovirus is a human reovirus.
35. (Previously presented) The method of claim 32 wherein the mammalian reovirus is serotype 3 virus.

36. (Previously presented) The method of claim 35 wherein the serotype 3 virus is the Dearing strain.

37. (Previously presented) The method of claim 31 further comprising the step of freezing and storing the reovirus-treated composition in a solution containing DMSO.

38. (New) The method of claim 18 wherein the cellular composition comprises hematopoietic stem cells.

39. (New) The method of claim 38 wherein the hematopoietic stem cells have been harvested from bone marrow.

40. (New) The method of claim 38 wherein the hematopoietic stem cells have been harvested from blood.

41. (New) The method of claim 18 wherein the cellular composition comprises a tissue, an organ or any portion of a tissue or an organ.

42. (New) The method of claim 41 wherein the tissue or organ is selected from the group consisting of liver, kidney, heart, cornea, skin, lung, pancreatic islet cells, and whole blood.

43. (New) The method of claim 18 wherein the cellular composition comprises cultured cells, semen or eggs.

44. (New) The method of claim 19 wherein the cellular composition comprises hematopoietic stem cells.

45. (New) The method of claim 44 wherein the hematopoietic stem cells have been harvested from bone marrow.

46. (New) The method of claim 44 wherein the hematopoietic stem cells have been harvested from blood.
47. (New) The method of claim 19 wherein the cellular composition comprises a tissue, an organ or any portion of a tissue or an organ.
48. (New) The method of claim 47 wherein the tissue or organ is selected from the group consisting of liver, kidney, heart, cornea, skin, lung, pancreatic islet cells, and whole blood.
49. (New) The method of claim 19 wherein the cellular composition comprises cultured cells, semen or eggs.
